

ApiController

ApiController

kpiMvcApi.Controllers.KpidataController

```
classDiagram
    class ApiController
    class kpiMvcApiControllersKpidataController["kpiMvcApi.Controllers.KpidataController"]
    ApiController <|-- kpiMvcApiControllersKpidataController
```

The diagram illustrates a class hierarchy. At the top, there are two boxes, both labeled 'ApiController'. Below them, centered, is a box labeled 'kpiMvcApi.Controllers.KpidataController'. A horizontal line connects the two 'ApiController' boxes. From the center of this line, a vertical line descends to the top of the 'kpiMvcApi.Controllers.KpidataController' box. From this point, two vertical lines extend upwards, each ending in an arrowhead pointing to the bottom center of one of the 'ApiController' boxes, indicating that 'kpiMvcApi.Controllers.KpidataController' inherits from 'ApiController'.
