Chapter 1

Namespace Index

1.1 Namespace List

Here is a list of all documented namespaces with brief descriptions:

kpiMvcApi	7
kpiMvcApi.Controllers Implementiert die Controller der Dashboard Api	7
kpiMvcApi.DataTransferObjects	8
kpiMvcApi.Models	8

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

ApiController	
kpiMvcApi.Controllers.KpidataController	31
kpiMvcApi.Controllers.KpidataController	31
Controller	
kpiMvcApi.Controllers.ExportController	23
kpiMvcApi.Controllers.ExportController	23
kpiMvcApi.Controllers.HomeController	25
kpiMvcApi.Controllers.HomeController	25
kpiMvcApi.DataTransferObjects.DataDto	9
kpiMvcApi.DataTransferObjects.DeliveryDataDto	10
kpiMvcApi.DataTransferObjects.DeliveryDataDto	10
kpiMvcApi.DataTransferObjects.KvpDataDto	46
kpiMvcApi.DataTransferObjects.KvpDataDto	46
kpiMvcApi.DataTransferObjects.ProductionDataDto	58
kpiMvcApi.DataTransferObjects.ProductionDataDto	58
kpiMvcApi.DataTransferObjects.DataDtoRs	9
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs	12
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs	12
kpiMvcApi.DataTransferObjects.KvpDataDtoRs	48
kpiMvcApi.DataTransferObjects.KvpDataDtoRs	48
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs	60
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs	60
DbContext	
kpiMvcApi.Models.kpidbEntities1	45
kpiMvcApi.Models.kpidbEntities1	45
kpiMvcApi.Models.eCountry	20
kpiMvcApi.Models.eDelivery	20
kpiMvcApi.Models.eKvp	21
kpiMvcApi.Models.eKvpClass	21
kpiMvcApi.Models.eKvpState	21
kpiMvcApi.Models.ePcbClass	22
kpiMvcApi.Models.ePcbDaily	22
kpiMvcApi.Models.ePcbGeneration	22
HttpApplication	
kpiMvcApi.Global	25
kpiMvcApi.Global	25
kpiMvcApi.RouteConfig	70

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

kpiMvcApi.DataTransferObjects.DataDto	
Parent Class for all Data Transfer Objects	9
kpiMvcApi.DataTransferObjects.DataDtoRs	
Parent class for all recordsets	9
kpiMvcApi.DataTransferObjects.DeliveryDataDto	
Represents the delivery data model Transfers the data between the WebFrontend and the Database Backend	10
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs	
This Recordset stores a List of Delivery Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend	12
kpiMvcApi.Models.eCountry	20
kpiMvcApi.Models.eDelivery	20
kpiMvcApi.Models.eKvp	21
kpiMvcApi.Models.eKvpClass	21
kpiMvcApi.Models.eKvpState	21
kpiMvcApi.Models.ePcbClass	22
kpiMvcApi.Models.ePcbDaily	22
kpiMvcApi.Models.ePcbGeneration	22
kpiMvcApi.Controllers.ExportController	
Der Exportkontroller stellt den alle Dienste zur exportierung von Files zur Verfügung.	23
kpiMvcApi.Global	25
kpiMvcApi.Controllers.HomeController	
Webseite Controller Setllt die Views und die Partaialviews bereit	25
kpiMvcApi.Controllers.KpidataController	
This Controller contains all API GET POST PUT DELETE methods	31
kpiMvcApi.Models.kpidbEntities1	45
kpiMvcApi.DataTransferObjects.KvpDataDto	
Represents the Kvp data model Transfers the data between the WebFrontend and the Database Backend	46
kpiMvcApi.DataTransferObjects.KvpDataDtoRs	
This Recordset stores a List of Kvp Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend	48
kpiMvcApi.DataTransferObjects.ProductionDataDto	
Represents the Production data model Transfers the data between the WebFrontend and the Database Backend	58

[kpiMvcApi.DataTransferObjects.ProductionDataDtoRs](#)

This Recordset stores a List of ProductionData Data transfer objects It provides all Methods to read, write, update and delete data from databse It provides Methods to get HTML data for the frontend

60

[kpiMvcApi.RouteConfig](#)

Configuratuion für die Website

70

Chapter 4

Namespace Documentation

4.1 kpiMvcApi Namespace Reference

Namespaces

- namespace [Controllers](#)
Implementiert die Controller der Dashboard Api

Classes

- class [Global](#)
- class [RouteConfig](#)
Configuratuion für die Website
- class **WebApiConfig**
Konfiguration für die WebApi

4.2 kpiMvcApi.Controllers Namespace Reference

Implementiert die Controller der Dashboard Api

Classes

- class [ExportController](#)
Der Exportkontroller stellt den alle Dienste zur exportierung von Files zur Verfügung.
- class [HomeController](#)
Webseite Controller Setllt die Views und die Partaialviews bereit
- class [KpidataController](#)
This Controller contains all API GET POST PUT DELETE methods

4.2.1 Detailed Description

Implementiert die Controller der Dashboard Api

Implemts all REST API [Controllers](#)

4.3 kpiMvcApi.DataTransferObjects Namespace Reference

Classes

- class [DataDto](#)
Parent Class for all Data Transfer Objects
- class [DataDtoRs](#)
Parent class for all recordsets
- class [DeliveryDataDto](#)
Represents the delivery data model Transfers the data between the WebFrontend and the Database Backend
- class [DeliveryDataDtoRs](#)
This Recordset stores a List of Delivery Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend
- class [KvpDataDto](#)
Represents the Kvp data model Transfers the data between the WebFrontend and the Database Backend
- class [KvpDataDtoRs](#)
This Recordset stores a List of Kvp Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend
- class [ProductionDataDto](#)
Represents the Production data model Transfers the data between the WebFrontend and the Database Backend
- class [ProductionDataDtoRs](#)
This Recordset stores a List of ProductionData Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend

4.4 kpiMvcApi.Models Namespace Reference

Classes

- class [eCountry](#)
- class [eDelivery](#)
- class [eKvp](#)
- class [eKvpClass](#)
- class [eKvpState](#)
- class [ePcbClass](#)
- class [ePcbDaily](#)
- class [ePcbGeneration](#)
- class [kpidbEntities1](#)

Chapter 5

Class Documentation

5.1 kpiMvcApi.DataTransferObjects.DataDto Class Reference

Parent Class for all Data Transfer Objects

Inheritance diagram for kpiMvcApi.DataTransferObjects.DataDto:

5.1.1 Detailed Description

Parent Class for all Data Transfer Objects

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/DataTransfer↔
Objects/DataDto.cs

5.2 kpiMvcApi.DataTransferObjects.DataDtoRs Class Reference

Parent class for all recordsets

Inheritance diagram for kpiMvcApi.DataTransferObjects.DataDtoRs:

5.2.1 Detailed Description

Parent class for all recordsets

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/DataTransfer↔
Objects/DataDtoRs.cs

5.3 kpiMvcApi.DataTransferObjects.DeliveryDataDto Class Reference

Represents the deelivery data model Transfers the data between the WebFrontend and the Database Backend

Inheritance diagram for kpiMvcApi.DataTransferObjects.DeliveryDataDto:

Properties

- int [DeliveryId](#) [get, set]
The Database Kvp Id
- DateTime [OrderDate](#) [get, set]
The Date the Pcb's were ordered
- int [OrderedPc](#) [get, set]
The Sum of Pcb's that was ordered
- int [DeliveredPc](#) [get, set]
The Deliverd Pcb's for this order
- int [NotdeliveredPc](#) [get, set]
The not deliverd Pcb's for this Orders
- float [NotdeliveredRel](#) [get, set]
The not deliverd Pcb's for this Orders in %
- int [CountryId](#) [get, set]
The Destination Country Id
- string [CountryName](#) [get, set]
The Destination Country Name countryId countryName <list type="bullet" | "number" | "table"> 0 generic 1 Switzerland 2 France 3 USA 4 India 5 China 6 Brasil

5.3.1 Detailed Description

Represents the deelivery data model Transfers the data between the WebFrontend and the Database Backend

5.3.2 Property Documentation

5.3.2.1 CountryId

```
int kpiMvcApi.DataTransferObjects.DeliveryDataDto.CountryId [get], [set]
```

The Destination Country Id

5.3.2.2 CountryName

```
string kpiMvcApi.DataTransferObjects.DeliveryDataDto.CountryName [get], [set]
```

The Destination Country Name countryId countryName <list type="bullet" | "number" | "table"> 0 generic 1 Switzerland 2 France 3 USA 4 India 5 China 6 Brasil

5.3.2.3 DeliveredPc

```
int kpiMvcApi.DataTransferObjects.DeliveryDataDto.DeliveredPc [get], [set]
```

The Deliverd Pcb's for this order

5.3.2.4 DeliveryId

```
int kpiMvcApi.DataTransferObjects.DeliveryDataDto.DeliveryId [get], [set]
```

The Database Kvp Id

5.3.2.5 NotdeliveredPc

```
int kpiMvcApi.DataTransferObjects.DeliveryDataDto.NotdeliveredPc [get], [set]
```

The not deliverd Pcb's for this Orders

5.3.2.6 NotdeliveredRel

```
float kpiMvcApi.DataTransferObjects.DeliveryDataDto.NotdeliveredRel [get], [set]
```

The not deliverd Pcb's for this Orders in %

5.3.2.7 OrderDate

```
DateTime kpiMvcApi.DataTransferObjects.DeliveryDataDto.OrderDate [get], [set]
```

The Date the Pcb's were ordered

5.3.2.8 OrderedPc

```
int kpiMvcApi.DataTransferObjects.DeliveryDataDto.OrderedPc [get], [set]
```

The Sum of Pcb's that was ordered

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/DataTransferObjects/DeliveryDataDto.cs

5.4 kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs Class Reference

This Recordset stores a List of Delivery Data transfer objects. It provides all Methods to read, write, update and delete data from database. It provides Methods to get HTML data for the frontend.

Inheritance diagram for kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs:

Public Types

- enum [dataset](#) {
Datalabels = 0, **dataset1**, **dataset2**, **Datalabels** = 0,
dataset1, **dataset2** }
Containing the available diagram data val == 0 => x axis, val > 0 => y axis
- enum [charttype](#) { **DeliveryDaily** = 0, **DeliveryCountry**, **DeliveryDaily** = 0, **DeliveryCountry** }
Containing the available diagram types
- enum [dataset](#) {
Datalabels = 0, **dataset1**, **dataset2**, **Datalabels** = 0,
dataset1, **dataset2** }
Containing the available diagram data val == 0 => x axis, val > 0 => y axis
- enum [charttype](#) { **DeliveryDaily** = 0, **DeliveryCountry**, **DeliveryDaily** = 0, **DeliveryCountry** }
Containing the available diagram types

Public Member Functions

- [DeliveryDataDtoRs](#) ()
Constructor loads the default data from 1.1.18 till today
- [DeliveryDataDtoRs](#) (int id)
Constructor loads the specified id
- [DeliveryDataDtoRs](#) (DateTime startdate, DateTime stopdate)
Constructor loads with the specified daterange
- void [loadData](#) ()
loads the default data from 1.1.18 till today stores in object [DeliveryDataDtoRs](#)

- void [loadData](#) (int id)
loads the specified dataset id stores in object [DeliveryDataDtoRs](#)
- void [loadData](#) (DateTime startdate, DateTime stopdate)
Constructor loads with the specified daterange stores in object [DeliveryDataDtoRs](#)
- List< [DeliveryDataDto](#) > [getData](#) ()
Get all Data from [DeliveryDataDtoRs](#)
- bool [setData](#) (List< [DeliveryDataDto](#) > deldto)
Adds Kvp Data into the database Generates new id for each dataset
- string [getDataset](#) (charttype charttype, dataset dataset, string filter)
Produces Datastrings for the html / chart.js charts
- List< [DeliveryDataDto](#) > [getDeliveryList](#) ()
Returns the delivery label
- string [getDatasetLabel](#) (charttype charttype, dataset dataset)
- string [getDatasetBackgroundColor](#) ()
- string [getChartTitle](#) (charttype charttype)
- int [getChartBorderWidth](#) ()
- [DeliveryDataDtoRs](#) ()
Constructor loads the default data from 1.1.18 till today
- [DeliveryDataDtoRs](#) (int id)
Constructor loads the specified id
- [DeliveryDataDtoRs](#) (DateTime startdate, DateTime stopdate)
Constructor loads with the specified daterange
- void [loadData](#) ()
loads the default data from 1.1.18 till today stores in object [DeliveryDataDtoRs](#)
- void [loadData](#) (int id)
loads the specified dataset id stores in object [DeliveryDataDtoRs](#)
- void [loadData](#) (DateTime startdate, DateTime stopdate)
Constructor loads with the specified daterange stores in object [DeliveryDataDtoRs](#)
- List< [DeliveryDataDto](#) > [getData](#) ()
Get all Data from [DeliveryDataDtoRs](#)
- bool [setData](#) (List< [DeliveryDataDto](#) > deldto)
Adds Kvp Data into the database Generates new id for each dataset
- string [getDataset](#) (charttype charttype, dataset dataset, string filter)
Produces Datastrings for the html / chart.js charts
- List< [DeliveryDataDto](#) > [getDeliveryList](#) ()
Returns the delivery label
- string [getDatasetLabel](#) (charttype charttype, dataset dataset)
- string [getDatasetBackgroundColor](#) ()
- string [getChartTitle](#) (charttype charttype)
- int [getChartBorderWidth](#) ()

Properties

- List< [DeliveryDataDto](#) > [DeliveryDataRs](#) [get, set]
A List of Delivery Data transfer Objects This List is loaded at construction and represent the actual Dataset

5.4.1 Detailed Description

This Recordset stores a List of Delivery Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend

5.4.2 Member Enumeration Documentation

5.4.2.1 charttype [1/2]

```
enum kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.charttype [strong]
```

Containing zhe available diagramm types

5.4.2.2 charttype [2/2]

```
enum kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.charttype [strong]
```

Containing zhe available diagramm types

5.4.2.3 dataset [1/2]

```
enum kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.dataset [strong]
```

Containing the available diagramm data `val == 0 => x axis, val > 0 => y axis`

5.4.2.4 dataset [2/2]

```
enum kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.dataset [strong]
```

Containing the available diagramm data `val == 0 => x axis, val > 0 => y axis`

5.4.3 Constructor & Destructor Documentation

5.4.3.1 DeliveryDataDtoRs() [1/6]

```
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.DeliveryDataDtoRs ( ) [inline]
```

Constructor loads the default data from 1.1.18 till today

5.4.3.2 DeliveryDataDtoRs() [2/6]

```
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.DeliveryDataDtoRs (  
    int id ) [inline]
```

Constructor loads the specified id

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.4.3.3 DeliveryDataDtoRs() [3/6]

```
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.DeliveryDataDtoRs (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.4.3.4 DeliveryDataDtoRs() [4/6]

```
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.DeliveryDataDtoRs ( ) [inline]
```

Constructor loads the default data from 1.1.18 till today

5.4.3.5 DeliveryDataDtoRs() [5/6]

```
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.DeliveryDataDtoRs (
    int id ) [inline]
```

Constructor loads the specified id

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.4.3.6 DeliveryDataDtoRs() [6/6]

```
kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.DeliveryDataDtoRs (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.4.4 Member Function Documentation

5.4.4.1 `getData()` [1/2]

```
List<DeliveryDataDto> kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.getData ( ) [inline]
```

Get all Data from [DeliveryDataDtoRs](#)

Returns

List [DeliveryDataDtoRs](#) A list with in this object loaded production data

5.4.4.2 `getData()` [2/2]

```
List<DeliveryDataDto> kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.getData ( ) [inline]
```

Get all Data from [DeliveryDataDtoRs](#)

Returns

List [DeliveryDataDtoRs](#) A list with in this object loaded production data

5.4.4.3 `getDataset()` [1/2]

```
string kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.getDataset (
    charttype charttype,
    dataset dataset,
    string filter ) [inline]
```

Produces Datastrings for the html / chart.js charts

Parameters

<i>charttype</i>	
<i>dataset</i>	
<i>filter</i>	"y" year, "M" month, "d" day

Returns

string HTML.Raw Datastring string for direct implementation in html.raw() view

5.4.4.4 getDataset() [2/2]

```
string kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.getDataset (
    charttype charttype,
    dataset dataset,
    string filter ) [inline]
```

Produces Datastrings for the html / chart.js charts

Parameters

<i>charttype</i>	
<i>dataset</i>	
<i>filter</i>	"y" year, "M" month, "d" day

Returns

string HTML.Raw Datastring string for direct implementation in html.raw() view

5.4.4.5 getDeliveryList() [1/2]

```
List<DeliveryDataDto> kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.getDeliveryList ( )
[inline]
```

Returns the delivery label

Returns

string containing the Chartlabel text

5.4.4.6 getDeliveryList() [2/2]

```
List<DeliveryDataDto> kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.getDeliveryList ( )
[inline]
```

Returns the delivery label

Returns

string containing the Chartlabel text

5.4.4.7 loadData() [1/6]

```
void kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.loadData ( ) [inline]
```

loads the default data from 1.1.18 till today stores in object [DeliveryDataDtoRs](#)

5.4.4.8 loadData() [2/6]

```
void kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.loadData ( ) [inline]
```

loads the default data from 1.1.18 till today stores in object [DeliveryDataDtoRs](#)

5.4.4.9 loadData() [3/6]

```
void kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.loadData (
    int id ) [inline]
```

loads the specified dataset id stores in object [DeliveryDataDtoRs](#)

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.4.4.10 loadData() [4/6]

```
void kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.loadData (
    int id ) [inline]
```

loads the specified dataset id stores in object [DeliveryDataDtoRs](#)

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.4.4.11 loadData() [5/6]

```
void kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.loadData (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange stores in object [DeliveryDataDtoRs](#)

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.4.4.12 loadData() [6/6]

```
void kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.loadData (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange stores in object [DeliveryDataDtoRs](#)

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.4.4.13 setData() [1/2]

```
bool kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.setData (
    List< DeliveryDataDto > deldto ) [inline]
```

Adds Kvp Data into the database Generates new id for each dataset

Parameters

<i>deldto</i>	List DeliveryDataDtoRs a list of Kvp data data transfer object
---------------	--

Returns

booo success

5.4.4.14 setData() [2/2]

```
bool kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.setData (
    List< DeliveryDataDto > deldto ) [inline]
```

Adds Kvp Data into the database Generates new id for each dataset

Parameters

<i>deldto</i>	List DeliveryDataDtoRs a list of Kvp data data transfer object
---------------	--

Returns

booo success

5.4.5 Property Documentation

5.4.5.1 DeliveryDataRs

```
List< DeliveryDataDto > kpiMvcApi.DataTransferObjects.DeliveryDataDtoRs.DeliveryDataRs [get],
[set]
```

A List of Delivery Data transfer Objects This List is loaded at construction and represent the actual Dataset

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/DataTransfer↔ Objects/DeliveryDataDtoRs.cs

5.5 kpiMvcApi.Models.eCountry Class Reference

Properties

- int **countryId** [get, set]
- string **countryName** [get, set]
- virtual ICollection< [eDelivery](#) > **eDeliveries** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/eCountry.cs

5.6 kpiMvcApi.Models.eDelivery Class Reference

Properties

- int **deliveryId** [get, set]
- System.DateTime **orderDate** [get, set]
- int **orderedPc** [get, set]
- int **deliveredPc** [get, set]
- int **countryId** [get, set]
- virtual [eCountry](#) **eCountry** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/eDelivery.cs

5.7 kpiMvcApi.Models.eKvp Class Reference

Properties

- int **kvpId** [get, set]
- string **kvpName** [get, set]
- System.DateTime **kvpDate** [get, set]
- int **kvpClassId** [get, set]
- int **kvpStatId** [get, set]
- virtual [eKvpClass](#) **eKvpClass** [get, set]
- virtual [eKvpState](#) **eKvpState** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/eKvp.cs

5.8 kpiMvcApi.Models.eKvpClass Class Reference

Properties

- int **kvpClassId** [get, set]
- string **kvpClassName** [get, set]
- virtual ICollection< [eKvp](#) > **eKvps** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/eKvpClass.cs

5.9 kpiMvcApi.Models.eKvpState Class Reference

Properties

- int **kvpStatId** [get, set]
- string **kvpStateName** [get, set]
- virtual ICollection< [eKvp](#) > **eKvps** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/eKvpState.cs

5.10 kpiMvcApi.Models.ePcbClass Class Reference

Properties

- int **pcbClassId** [get, set]
- string **ClassName** [get, set]
- virtual ICollection< [ePcbDaily](#) > **ePcbDailies** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/ePcbClass.cs

5.11 kpiMvcApi.Models.ePcbDaily Class Reference

Properties

- int **pcbDailyId** [get, set]
- System.DateTime **productionDay** [get, set]
- int **pcbQuantity** [get, set]
- decimal **pcbSumPrice** [get, set]
- int **pcbGenerationId** [get, set]
- int **pcbClassId** [get, set]
- virtual [ePcbClass](#) **ePcbClass** [get, set]
- virtual [ePcbGeneration](#) **ePcbGeneration** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/ePcbDaily.cs

5.12 kpiMvcApi.Models.ePcbGeneration Class Reference

Properties

- int **pcbGenerationId** [get, set]
- string **genName** [get, set]
- virtual ICollection< [ePcbDaily](#) > **ePcbDailies** [get, set]

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Models/ePcb↔
Generation.cs

5.13 kpiMvcApi.Controllers.ExportController Class Reference

Der Exportkontrolller stellt den alle Dienste zur exportierung von Files zur Verfügung.

Inheritance diagram for kpiMvcApi.Controllers.ExportController:

Public Member Functions

- ActionResult [ProdDataToExcel](#) ()
Nimmt daten aus dem Production Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls
- ActionResult [KvpDataToExcel](#) ()
Nimmt daten aus dem Kvp Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls
- ActionResult [DeliveryDataToExcel](#) ()
Nimmt daten aus dem Deliovery Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls
- ActionResult [ProdDataToExcel](#) ()
Nimmt daten aus dem Production Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls
- ActionResult [KvpDataToExcel](#) ()
Nimmt daten aus dem Kvp Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls
- ActionResult [DeliveryToExcel](#) ()
Nimmt daten aus dem Deliovery Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls

5.13.1 Detailed Description

Der Exportkontrolller stellt den alle Dienste zur exportierung von Files zur Verfügung.

5.13.2 Member Function Documentation

5.13.2.1 DeliveryDataToExcel()

```
ActionResult kpiMvcApi.Controllers.ExportController.DeliveryDataToExcel ( ) [inline]
```

Nimmt daten aus dem Deliovery Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls

Returns

View() Excell .xls File

5.13.2.2 DeliveryToExcel()

```
ActionResult kpiMvcApi.Controllers.ExportController.DeliveryToExcel ( ) [inline]
```

Nimmt daten aus dem Deliovery Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls

Returns

View() Excell .xls File

5.13.2.3 KvpDataToExcel() [1/2]

```
ActionResult kpiMvcApi.Controllers.ExportController.KvpDataToExcel ( ) [inline]
```

Nimmt daten aus dem Kvp Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls

Returns

View() Excell .xls File

5.13.2.4 KvpDataToExcel() [2/2]

```
ActionResult kpiMvcApi.Controllers.ExportController.KvpDataToExcel ( ) [inline]
```

Nimmt daten aus dem Kvp Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls

Returns

View() Excell .xls File

5.13.2.5 ProdDataToExcel() [1/2]

```
ActionResult kpiMvcApi.Controllers.ExportController.ProdDataToExcel ( ) [inline]
```

Nimmt daten aus dem Production Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls

Returns

View() Excell .xls File

5.13.2.6 ProdDataToExcel() [2/2]

```
ActionResult kpiMvcApi.Controllers.ExportController.ProdDataToExcel ( ) [inline]
```

Nimmt daten aus dem Production Data Data Transfer Object Recordset Bindet die Daten in eine Gridview Exportiert die Daten in eine Excell.xls

Returns

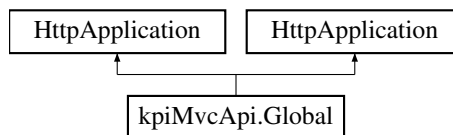

View() Excell .xls File

The documentation for this class was generated from the following file:

5.14 kpiMvcApi.Global Class Reference

Inheritance diagram for kpiMvcApi.Global:

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Global.asax.cs

5.15 kpiMvcApi.Controllers.HomeController Class Reference

Webseite Controller Setllt die Views und die Partaialviews bereit

Inheritance diagram for kpiMvcApi.Controllers.HomeController:

Public Member Functions

- ActionResult [Frame](#) ()
Test Webseite um Funktionen zu testen
- ActionResult [Home](#) ()
Das Home Fenster
- ActionResult [UserLogin](#) ()
Das User Login Fenster Returns the View to login a User
- ActionResult [ProductionData](#) (string startDate, string stopDate)
Das Production Data Fenster Versucht einen Date String in eine DateTime Class zu arsen Der Datensatz wird über diese Datumswerte gefiltert Für nicht gültige Datumswerte wird ein standarddatum von 1.1.18 bis zum aktuellen Tag gewählt
- ActionResult [Kvp](#) (string startDate, string stopDate)
The KVP View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded
- ActionResult [Delivery](#) (string startDate, string stopDate)
The Delivery View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded
- ActionResult [Frame](#) ()
Test Webseite um Funktionen zu testen
- ActionResult [Home](#) ()
Das Home Fenster
- ActionResult [UserLogin](#) ()
Das User Login Fenster Returns the View to login a User
- ActionResult [ProductionData](#) (string startDate, string stopDate)
Das Production Data Fenster Versucht einen Date String in eine DateTime Class zu arsen Der Datensatz wird über diese Datumswerte gefiltert Für nicht gültige Datumswerte wird ein standarddatum von 1.1.18 bis zum aktuellen Tag gewählt
- ActionResult [Kvp](#) (string startDate, string stopDate)
The KVP View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded
- ActionResult [Delivery](#) (string startDate, string stopDate)
The Delivery View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded

5.15.1 Detailed Description

Webseite Controller Setllt die Views und die Partaialviews bereit

5.15.2 Member Function Documentation

5.15.2.1 Delivery() [1/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Delivery (
    string startDate,
    string stopDate ) [inline]
```

The Delivery View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

`PartialView("_Delivery", model);` The View Containing all selected Delivery Data, shown as a diagram and a Table. Also provide an Excell export function

5.15.2.2 Delivery() [2/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Delivery (
    string startDate,
    string stopDate ) [inline]
```

The Delivery View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

`PartialView("_Delivery", model);` The View Containing all selected Delivery Data, shown as a diagram and a Table. Also provide an Excell export function

5.15.2.3 Frame() [1/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Frame ( ) [inline]
```

Test Webseite um Funktionen zu testen

Returns

`ActionResult IndexView` Die Index View

Das Dashboard Fenster

Returns

`ActionResult FrameView` Gibt die FrameView zurück. Diese Beinhaltet die Sidebar und die Menueleiste.

5.15.2.4 Frame() [2/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Frame ( ) [inline]
```

Test Webseite um Funktionen zu testen

Returns

ActionResult IndexView Die Index View

Das Dashboard Fenster

Returns

ActionResult FrameView Gibt die FrameView zurück. Diese Beinhaltet die Sidebar und die Menueleiste.

5.15.2.5 Home() [1/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Home ( ) [inline]
```

Das Home Fenster

Returns

ActionResult _HomeView Gibt die HomeView als Partielle View zurück. Diese Beinhaltet die Übersicht über Verfügbare Dashboards

5.15.2.6 Home() [2/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Home ( ) [inline]
```

Das Home Fenster

Returns

ActionResult _HomeView Gibt die HomeView als Partielle View zurück. Diese Beinhaltet die Übersicht über Verfügbare Dashboards

5.15.2.7 Kvp() [1/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Kvp (
    string startDate,
    string stopDate ) [inline]
```

The KVP View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

`PartialView("_Kvp", model);` The View Containing all selected KVP Data, shown as a diagram and a List. Also provide an Excell export function

5.15.2.8 Kvp() [2/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.Kvp (
    string startDate,
    string stopDate ) [inline]
```

The KVP View Tries to parse the Date Strings to DateTime Class The Data is filtered by these Parameters For nonvalid Dates the Standarddate will be loaded

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

`PartialView("_Kvp", model);` The View Containing all selected KVP Data, shown as a diagram and a List. Also provide an Excell export function

5.15.2.9 ProductionData() [1/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.ProductionData (
    string startDate,
    string stopDate ) [inline]
```

Das Production Data Fenster Versucht einen Date String in eine DateTime Class zu arsen Der Datensatz wird über diese Datumswerte gefiltert Für nicht gültige Datumswerte wird ein standarddatum von 1.1.18 bis zum aktuellen Tag gewählt

Parameters

<i>startDate</i>	The Date the Dataset starts
<i>stopDate</i>	The Date the Dataset stops

Returns

`ActionResult PartialView("_ProductionData", model);` The View containing all selected Production Date, shown as a diagram and a table. Also provide an Excell export function

5.15.2.10 ProductionData() [2/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.ProductionData (
    string startDate,
    string stopDate ) [inline]
```

Das Production Data Fenster Versucht einen Date String in eine DateTime Class zu arsen Der Datensatz wird über diese Datumswerte gefiltert Für nicht gültige Datumswerte wird ein standarddatum von 1.1.18 bis zum aktuellen Tag gewählt

Parameters

<i>startDate</i>	The Date the Dataset starts
<i>stopDate</i>	The Date the Dataset stops

Returns

`ActionResult PartialView("_ProductionData", model);` The View containing all selected Production Date, shown as a diagram and a table. Also provide an Excell export function

5.15.2.11 UserLogin() [1/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.UserLogin ( ) [inline]
```

Das User Login Fenster Returns the View to login a User

Returns

`ActionResult _UserLoginView` Gibt die _UserLoginView als Partielle View zurück. Diese Beinhaltet die Funktion um den User einzuloggen

5.15.2.12 UserLogin() [2/2]

```
ActionResult kpiMvcApi.Controllers.HomeController.UserLogin ( ) [inline]
```

Das User Login Fenster Returns the View to login a User

Returns

`ActionResult _UserLoginView` Gibt die _UserLoginView als Partielle View zurück. Diese Beinhaltet die Funktion um den User einzuloggen

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/Controllers/HomeController.cs

5.16 kpiMvcApi.Controllers.KpidataController Class Reference

This Controller contains all API GET POST PUT DELETE methods

Inheritance diagram for kpiMvcApi.Controllers.KpidataController:

Public Member Functions

- List< [ProductionDataDto](#) > [getProductionData](#) ()
Returns the Production Data from 1.1.2018 till the actual Date
- List< [ProductionDataDto](#) > [getProductionData](#) (int id)
Returns the Production Data from with the specified id
- List< [ProductionDataDto](#) > [getProductionData](#) (string startDate, string stopDate)
Returns the Production Data between the specified Dates with the specified id
- HttpResponseMessage [setProductionData](#) (List< [ProductionDataDto](#) > prodDataList)
Adds data into the database, creates new identifiers The data must hafe the following Format [{ "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]
- HttpResponseMessage [updateProductionData](#) (List< [ProductionDataDto](#) > prodDataList)
Adds data into the database If the Id alredy exists, update the Dataset if not create the dataset The data must hafe the following format [{ "PcbDailyId": 8, "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]
- HttpResponseMessage [deleteProductionData](#) (List< [ProductionDataDto](#) > prodDataList)
Deletes data ^ with specified id from the database The data must hafe the following format [{ "PcbDailyId": 8, }, { ... }]
- HttpResponseMessage [deleteProductionData](#) (string startDate, string stopDate)
Deletes data in the specified daterange
- List< [KvpDataDto](#) > [getKvpData](#) ()
Returns the KVP Data from 1.1.2018 till the actual Date
- List< [KvpDataDto](#) > [getKvpData](#) (int id)
Returns the KVP Data from with the specified id
- List< [KvpDataDto](#) > [getKvpData](#) (string startDate, string stopDate)
Returns the KVP Data between the specified Dates with the specified id
- HttpResponseMessage [setKvpData](#) (List< [KvpDataDto](#) > kvpDataList)
Adds data into the database, creates new identifiers The data must hafe the following Format [{ "KvpName": "Dashboard3", "KvpDate": "2018-01-05T00:00:00", "KvpClassId": 2, "KvpStateId": 2, "KvpStateName": "Do", "KvpClassName": "Produktivität" }, { ... }]
- HttpResponseMessage [updateKvpData](#) (List< [KvpDataDto](#) > kvpDataList)
Adds data into the database If the Id alredy exists, update the Dataset if not create the dataset The data must hafe the following format [{ "KvpId": 4, "KvpName": "Dashboard3", "KvpDate": "2018-01-05T00:00:00", "KvpClassId": 2, "KvpStateId": 2, "KvpStateName": "Do", "KvpClassName": "Produktivität" }, { ... }]
- HttpResponseMessage [deleteKvpData](#) (List< [KvpDataDto](#) > kvpld)
Deletes data with specified id from the database The data must hafe the following format [{ "KvpId": 8, }, { ... }]
- HttpResponseMessage [deleteKvpData](#) (string startDate, string stopDate)
Deletes data in the specified daterange

- List< [DeliveryDataDto](#) > [getDeliveryData](#) ()
Returns the Delivery Data from 1.1.2018 till the actual Date
- List< [DeliveryDataDto](#) > [getDeliveryData](#) (int id)
Returns the Delivery Data from with the specified id
- List< [DeliveryDataDto](#) > [getDeliveryData](#) (string startDate, string stopDate)
Returns the Delivery Data between the specified Dates with the specified id
- HttpResponseMessage [setDeliveryData](#) (List< [DeliveryDataDto](#) > deliveryDataList)
Adds data into the database, creates new identifiers The data must have the following Format [{ "OrderDate": "2018-01-01T00:00:00", "OrderedPc": 100, "DeliveredPc": 100, "NotdeliveredPc": null, "NotdeliveredRel": null, "CountryId": 1, "CountryName": "Switzerland" }, { ... }]
- HttpResponseMessage [updateDeliveryData](#) (List< [DeliveryDataDto](#) > deliveryDataList)
Adds data into the database If the Id already exists, update the Dataset if not create the dataset The data must have the following format [{ "DeliveryId": 4, "OrderDate": "2018-01-01T00:00:00", "OrderedPc": 100, "DeliveredPc": 100, "NotdeliveredPc": null, "NotdeliveredRel": null, "CountryId": 1, "CountryName": "Switzerland" }, { ... }]
- HttpResponseMessage [deleteDeliveryData](#) (List< [DeliveryDataDto](#) > deliveryDataList)
Deletes data with specified id from the database The data must have the following format [{ "DeliveryId": 8, }, { ... }]
- HttpResponseMessage [deleteDeliveryData](#) (string startDate, string stopDate)
Deletes data in the specified daterange
- List< [ProductionDataDto](#) > [getProductionData](#) ()
Returns the Production Data from 1.1.2018 till the actual Date
- List< [ProductionDataDto](#) > [getProductionData](#) (int id)
Returns the Production Data from with the specified id
- List< [ProductionDataDto](#) > [getProductionData](#) (string startDate, string stopDate)
Returns the Production Data between the specified Dates with the specified id
- HttpResponseMessage [setProductionData](#) (List< [ProductionDataDto](#) > prodDataList)
Adds data into the database, creates new identifiers The data must have the following Format [{ "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]
- HttpResponseMessage [updateProductionData](#) (List< [ProductionDataDto](#) > prodDataList)
Adds data into the database If the Id already exists, update the Dataset if not create the dataset The data must have the following format [{ "PcbDailyId": 8, "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]
- HttpResponseMessage [deleteProductionData](#) (List< [ProductionDataDto](#) > prodDataList)
Deletes data ^ with specified id from the database The data must have the following format [{ "PcbDailyId": 8, }, { ... }]
- HttpResponseMessage [deleteProductionData](#) (string startDate, string stopDate)
Deletes data in the specified daterange
- List< [KvpDataDto](#) > [getKvpData](#) ()
- List< [KvpDataDto](#) > [getKvpData](#) (int id)
- List< [KvpDataDto](#) > [getKvpData](#) (string startDate, string stopDate)
- HttpResponseMessage [setKvpData](#) (List< [KvpDataDto](#) > kvpDataList)
- HttpResponseMessage [updateKvpData](#) (List< [KvpDataDto](#) > kvpDataList)
- HttpResponseMessage [deleteKvpData](#) (List< [KvpDataDto](#) > kvpId)
- HttpResponseMessage [deleteKvpData](#) (string startDate, string stopDate)
Deletes data in the specified daterange
- List< [DeliveryDataDto](#) > [getDeliveryData](#) ()
- List< [DeliveryDataDto](#) > [getDeliveryData](#) (int id)
- List< [DeliveryDataDto](#) > [getDeliveryData](#) (string startDate, string stopDate)
- HttpResponseMessage [setDeliveryData](#) (List< [DeliveryDataDto](#) > deliveryDataList)
- HttpResponseMessage [updateDeliveryData](#) (List< [DeliveryDataDto](#) > deliveryDataList)
- HttpResponseMessage [deleteDeliveryData](#) (List< [DeliveryDataDto](#) > deliveryDataList)
- HttpResponseMessage [deleteDeliveryData](#) (string startDate, string stopDate)
Deletes data in the specified daterange

5.16.1 Detailed Description

This Controller contains all API GET POST PUT DELETE methods

5.16.2 Member Function Documentation

5.16.2.1 deleteDeliveryData() [1/3]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteDeliveryData (
    string startDate,
    string stopDate ) [inline]
```

Deletes data in the specified daterange

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

HttpResponseMessage

5.16.2.2 deleteDeliveryData() [2/3]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteDeliveryData (
    List< DeliveryDataDto > deliveryDataList ) [inline]
```

Deletes data with specified id from the database The data must hafe the following format [{ "DeliveryId": 8, }, { ... }]

Parameters

<i>deliveryDataList</i>	Dataset Id to delete in Json Format
-------------------------	-------------------------------------

Returns

HttpResponseMessage

5.16.2.3 deleteDeliveryData() [3/3]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteDeliveryData (
    string startDate,
    string stopDate ) [inline]
```

Deletes data in the specified daterange

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

HttpResponseMessage

5.16.2.4 deleteKvpData() [1/3]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteKvpData (
    string startDate,
    string stopDate ) [inline]
```

Deletes data in the specified daterange

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

HttpResponseMessage

5.16.2.5 deleteKvpData() [2/3]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteKvpData (
    List< KvpDataDto > kvpId ) [inline]
```

Deletes data with specified id from the database The data must hafe the following format [{ "KvpId": 8, }, { ... }]

Parameters

<i>kvpId</i>	Dataset Id to delete in Json Format
--------------	-------------------------------------

Returns

HttpResponseMessage

5.16.2.6 deleteKvpData() [3/3]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteKvpData (
    string startDate,
    string stopDate ) [inline]
```

Deletes data in the specified daterange

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

HttpResponseMessage

5.16.2.7 deleteProductionData() [1/4]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteProductionData (
    List< ProductionDataDto > prodDataList ) [inline]
```

Deletes data ^with specified id from the database The data must hafe the following format [{ "PcbDailyId": 8, }, { ... }]

Parameters

<i>prodDataList</i>	Dataset Id to delete in Json Format
---------------------	-------------------------------------

Returns

HttpResponseMessage

5.16.2.8 deleteProductionData() [2/4]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteProductionData (
    List< ProductionDataDto > prodDataList ) [inline]
```

Deletes data ^with specified id from the database The data must hafe the following format [{ "PcbDailyId": 8, }, { ... }]

Parameters

<i>prodDataList</i>	Dataset Id to delete in Json Format
---------------------	-------------------------------------

Returns

HttpResponseMessage

5.16.2.9 deleteProductionData() [3/4]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteProductionData (
    string startDate,
    string stopDate ) [inline]
```

Deletes data in the specified daterange

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

HttpResponseMessage

5.16.2.10 deleteProductionData() [4/4]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.deleteProductionData (
    string startDate,
    string stopDate ) [inline]
```

Deletes data in the specified daterange

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

HttpResponseMessage

5.16.2.11 getDeliveryData() [1/3]

```
List<DeliveryDataDto> kpiMvcApi.Controllers.KpidataController.getDeliveryData ( ) [inline]
```

Returns the Delivery Data from 1.1.2018 till the actual Date

Returns

Returns JSON data in the format:

```
[
  {
    "KvpId": 4,
    "KvpName": "Dashboard3",
    "KvpDate": "2018-01-05T00:00:00",
    "KvpClassId": 2,
    "KvpStateId": 2,
    "KvpStateName": "Do",
    "KvpClassName": "Produktivität"
  }
  {
    ...
  }
]
```

5.16.2.12 getDeliveryData() [2/3]

```
List<DeliveryDataDto> kpiMvcApi.Controllers.KpidataController.getDeliveryData (
    int id ) [inline]
```

Returns the Delivery Data from with the specified id

Parameters

<i>id</i>	Sets the Dataid
-----------	-----------------

Returns

Returns JSON data

5.16.2.13 getDeliveryData() [3/3]

```
List<DeliveryDataDto> kpiMvcApi.Controllers.KpidataController.getDeliveryData (
    string startDate,
    string stopDate ) [inline]
```

Returns the Delivery Data between the specified Dates with the specified id

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

Returns JSON data

5.16.2.14 `getKvpData()` [1/3]

```
List<KvpDataDto> kpiMvcApi.Controllers.KpidataController.getKvpData ( ) [inline]
```

Returns the KVP Data from 1.1.2018 till the actual Date

Returns

Returns JSON data in the format:

```
[
  {
    "KvpId": 4,
    "KvpName": "Dashboard3",
    "KvpDate": "2018-01-05T00:00:00",
    "KvpClassId": 2,
    "KvpStateId": 2,
    "KvpStateName": "Do",
    "KvpClassName": "Produktivität"
  }
  ...
]
```

5.16.2.15 `getKvpData()` [2/3]

```
List<KvpDataDto> kpiMvcApi.Controllers.KpidataController.getKvpData (
    int id ) [inline]
```

Returns the KVP Data from with the specified id

Parameters

<i>id</i>	Sets the Dataid
-----------	-----------------

Returns

Returns JSON data

5.16.2.16 `getKvpData()` [3/3]

```
List<KvpDataDto> kpiMvcApi.Controllers.KpidataController.getKvpData (
    string startDate,
    string stopDate ) [inline]
```

Returns the KVP Data between the specified Dates with the specified id

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

Returns JSON data

5.16.2.17 getProductionData() [1/6]

```
List<ProductionDataDto> kpiMvcApi.Controllers.KpidataController.getProductionData ( ) [inline]
```

Returns the Production Data from 1.1.2018 till the actual Date

Returns

Returns JSON data in the format:

```
[
  {
    "PcbDailyId": 7,
    "ProductionDay": "2018-01-09T00:00:00",
    "PcbQuantity": 512345,
    "PcbSumPrice": 5123456,
    "PcbGenerationId": 3,
    "PcbClassId": 0,
    "PcbGenerationName": null,
    "PcbClassName": null
  },
  {
    ...
  }
]
```

5.16.2.18 getProductionData() [2/6]

```
List<ProductionDataDto> kpiMvcApi.Controllers.KpidataController.getProductionData ( ) [inline]
```

Returns the Production Data from 1.1.2018 till the actual Date

Returns

Returns JSON data in the format:

```
[
  {
    "PcbDailyId": 7,
    "ProductionDay": "2018-01-09T00:00:00",
    "PcbQuantity": 512345,
    "PcbSumPrice": 5123456,
    "PcbGenerationId": 3,
    "PcbClassId": 0,
    "PcbGenerationName": null,
    "PcbClassName": null
  },
  {
    ...
  }
]
```

5.16.2.19 getProductionData() [3/6]

```
List<ProductionDataDto> kpiMvcApi.Controllers.KpidataController.getProductionData (
    int id ) [inline]
```

Returns the Production Data from with the specified id

Parameters

<i>id</i>	Sets the Dataid
-----------	-----------------

Returns

Returns JSON data

5.16.2.20 getProductionData() [4/6]

```
List<ProductionDataDto> kpiMvcApi.Controllers.KpidataController.getProductionData (
    int id ) [inline]
```

Returns the Production Data from with the specified id

Parameters

<i>id</i>	Sets the Dataid
-----------	-----------------

Returns

Returns JSON data

5.16.2.21 getProductionData() [5/6]

```
List<ProductionDataDto> kpiMvcApi.Controllers.KpidataController.getProductionData (
    string startDate,
    string stopDate ) [inline]
```

Returns the Production Data between the specified Dates with the specified id

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

Returns JSON data

5.16.2.22 getProductionData() [6/6]

```
List<ProductionDataDto> kpiMvcApi.Controllers.KpidataController.getProductionData (
    string startDate,
    string stopDate ) [inline]
```

Returns the Production Data between the specified Dates with the specified id

Parameters

<i>startDate</i>	
<i>stopDate</i>	

Returns

Returns JSON data

5.16.2.23 setDeliveryData()

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.setDeliveryData (
    List< DeliveryDataDto > deliveryDataList ) [inline]
```

Adds data into the database, creates new identifiers The data must have the following Format [{ "OrderDate": "2018-01-01T00:00:00", "OrderedPc": 100, "DeliveredPc": 100, "NotdeliveredPc": null, "NotdeliveredRel": null, "CountryId": 1, "CountryName": "Switzerland" }, { ... }]

Parameters

<i>deliveryDataList</i>	New Dataset in Json Format
-------------------------	----------------------------

Returns

HttpResponseMessage

5.16.2.24 setKvpData()

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.setKvpData (
    List< KvpDataDto > kvpDataList ) [inline]
```

Adds data into the database, creates new identifiers The data must have the following Format [{ "KvpName": "Dashboard3", "KvpDate": "2018-01-05T00:00:00", "KvpClassId": 2, "KvpStateId": 2, "KvpStateName": "Do", "KvpClassName": "Produktivität" }, { ... }]

Parameters

<i>kvpDataList</i>	New Dataset in Json Format
--------------------	----------------------------

Returns

HttpResponsMessage

5.16.2.25 setProductionData() [1/2]

```
HttpResponsMessage kpiMvcApi.Controllers.KpidataController.setProductionData (
    List< ProductionDataDto > prodDataList ) [inline]
```

Adds data into the database, creates new identifiers The data must hafe the following Format [{ "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]

Parameters

<i>prodDataList</i>	New Dataset in Json Format
---------------------	----------------------------

Returns

HttpResponsMessage

5.16.2.26 setProductionData() [2/2]

```
HttpResponsMessage kpiMvcApi.Controllers.KpidataController.setProductionData (
    List< ProductionDataDto > prodDataList ) [inline]
```

Adds data into the database, creates new identifiers The data must hafe the following Format [{ "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]

Parameters

<i>prodDataList</i>	New Dataset in Json Format
---------------------	----------------------------

Returns

HttpResponsMessage

5.16.2.27 updateDeliveryData()

```
HttpResponsMessage kpiMvcApi.Controllers.KpidataController.updateDeliveryData (
    List< DeliveryDataDto > deliveryDataList ) [inline]
```

Adds data into the database If the Id already exists, update the Dataset if not create the dataset The data must have the following format [{ "DeliveryId": 4, "OrderDate": "2018-01-01T00:00:00", "OrderedPc": 100, "DeliveredPc": 100, "NotdeliveredPc": null, "NotdeliveredRel": null, "CountryId": 1, "CountryName": "Switzerland" }, { ... }]

Parameters

<i>deliveryDataList</i>	New Dataset in Json Format
-------------------------	----------------------------

Returns

HttpResponseMessage

5.16.2.28 updateKvpData()

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.updateKvpData (
    List< KvpDataDto > kvpDataList ) [inline]
```

Adds data into the database If the Id already exists, update the Dataset if not create the dataset The data must have the following format [{ "KvpId": 4, "KvpName": "Dashboard3", "KvpDate": "2018-01-05T00:00:00", "KvpClassId": 2, "KvpStateId": 2, "KvpStateName": "Do", "KvpClassName": "Produktivität" }, { ... }]

Parameters

<i>kvpDataList</i>	New Dataset in Json Format
--------------------	----------------------------

Returns

HttpResponseMessage

5.16.2.29 updateProductionData() [1/2]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.updateProductionData (
    List< ProductionDataDto > prodDataList ) [inline]
```

Adds data into the database If the Id already exists, update the Dataset if not create the dataset The data must have the following format [{ "PcbDailyId": 8, "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]

Parameters

<i>prodDataList</i>	New Dataset in Json Format
---------------------	----------------------------

Returns

HttpResponseMessage

5.16.2.30 updateProductionData() [2/2]

```
HttpResponseMessage kpiMvcApi.Controllers.KpidataController.updateProductionData (
    List< ProductionDataDto > prodDataList ) [inline]
```

Adds data into the database If the Id already exists, update the Dataset if not create the dataset The data must have the following format [{ "PcbDailyId": 8, "ProductionDay": "2018-01-09T00:00:00", "PcbQuantity": 512345, "PcbSumPrice": 5123456, "PcbGenerationId": 3, "PcbClassId": 0, "PcbGenerationName": null, "PcbClassName": null }, { ... }]

Parameters

<i>prodDataList</i>	New Dataset in Json Format
---------------------	----------------------------

Returns

HttpResponseMessage

5.18 kpiMvcApi.DataTransferObjects.KvpDataDto Class Reference

Represents the Kvp data model Transfers the data between the WebFrontend and the Database Backend

Inheritance diagram for kpiMvcApi.DataTransferObjects.KvpDataDto:

Properties

- int [KvpId](#) [get, set]
The Database Kvp Id
- string [KvpName](#) [get, set]
The Header of the Kvp
- DateTime [KvpDate](#) [get, set]
The creation date the Kvp was created
- int [KvpClassId](#) [get, set]
The Class Id of the Kvp
- int [KvpStateId](#) [get, set]
The State Id of the Kvp
- string [KvpStateName](#) [get, set]
The Statenname 0 generic 1 Plan 2 Do 3 Check 4 Act
- string [KvpClassName](#) [get, set]
The Classname 0 generic 1 Qualität 2 Produktivität 3 Umwelt

5.18.1 Detailed Description

Represents the Kvp data model Transfers the data between the WebFrontend and the Database Backend

5.18.2 Property Documentation

5.18.2.1 KvpClassId

```
int kpiMvcApi.DataTransferObjects.KvpDataDto.KvpClassId [get], [set]
```

The Class Id of the Kvp

5.18.2.2 KvpClassName

```
string kpiMvcApi.DataTransferObjects.KvpDataDto.KvpClassName [get], [set]
```

The Classname 0 generic 1 Qualität 2 Produktivität 3 Umwelt

5.18.2.3 KvpDate

```
DateTime kpiMvcApi.DataTransferObjects.KvpDataDto.KvpDate [get], [set]
```

The creation date the Kvp was created

5.18.2.4 KvpId

```
int kpiMvcApi.DataTransferObjects.KvpDataDto.KvpId [get], [set]
```

The Database Kvp Id

5.18.2.5 KvpName

```
string kpiMvcApi.DataTransferObjects.KvpDataDto.KvpName [get], [set]
```

The Header of the Kvp

5.18.2.6 KvpStateId

```
int kpiMvcApi.DataTransferObjects.KvpDataDto.KvpStateId [get], [set]
```

The State Id of the Kvp

5.18.2.7 KvpStateName

```
string kpiMvcApi.DataTransferObjects.KvpDataDto.KvpStateName [get], [set]
```

The Statename 0 generic 1 Plan 2 Do 3 Check 4 Act

5.19 kpiMvcApi.DataTransferObjects.KvpDataDtoRs Class Reference

This Recordset stores a List of Kvp Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend

Inheritance diagram for kpiMvcApi.DataTransferObjects.KvpDataDtoRs:

Public Types

- enum [dataset](#) { **Datalabels** = 0, **dataset1**, **Datalabels** = 0, **dataset1** }
Containing the available diagramm data val == 0 => x axis, val > 0 => y axis
- enum [charttype](#) { **KvpMonthChart** = 0, **KvpClassChart**, **KvpMonthChart** = 0, **KvpClassChart** }
Containing zhe available diagramm types
- enum [dataset](#) { **Datalabels** = 0, **dataset1**, **Datalabels** = 0, **dataset1** }
Containing the available diagramm data val == 0 => x axis, val > 0 => y axis
- enum [charttype](#) { **KvpMonthChart** = 0, **KvpClassChart**, **KvpMonthChart** = 0, **KvpClassChart** }
Containing zhe available diagramm types

Public Member Functions

- [KvpDataDtoRs](#) ()
Constructor loads the default data from 1.1.18 till today
- [KvpDataDtoRs](#) (int id)
Constructor loads the specified id
- [KvpDataDtoRs](#) (DateTime startdate, DateTime stopdate)
Constructor loads with the specified daterange
- void [loadData](#) ()
loads the default data from 1.1.18 till today stores in object [KvpDataDtoRs](#)
- void [loadData](#) (int id)
loads the specified dataset id stores in object [KvpDataDtoRs](#)
- void [loadData](#) (DateTime startdate, DateTime stopdate)
Constructor loads with the specified daterange stores in object [KvpDataDtoRs](#)
- List< [KvpDataDto](#) > [getData](#) ()
Get all Data from [KvpDataDto](#)
- bool [setData](#) (List< [KvpDataDto](#) > kvpdto)
Adds Kvp Data into the database Generates new id for each datzaset
- string [getDataset](#) ([charttype](#) charttype, [dataset](#) dataset, string filter)
Produces Datastrings for the html / chart.js charts
- List< [KvpDataDto](#) > [getKvpList](#) ()
Returns the kvp list
- string [getDatasetLabel](#) ()
Returns the chart label
- string [getDatsetBackgroundColor](#) ()

- Returns the chart colors*
 - string [getChartTitle](#) ()
 - Returns the chart title*
 - int [getChartBorderWidth](#) ()
 - returns the boarer width*
 - [KvpDataDtoRs](#) ()
 - Constructor loads the default data from 1.1.18 till today*
 - [KvpDataDtoRs](#) (int id)

- A List of Kvp Data transfer Objects This List is loaded at construction and represent the actual Dataset*

5.19.1 Detailed Description

This Recordset stores a List of Kvp Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend

5.19.2 Member Enumeration Documentation

5.19.2.1 charttype [1/2]

```
enum kpiMvcApi.DataTransferObjects.KvpDataDtoRs.charttype [strong]
```

Containing zhe available diagramm types

5.19.2.2 charttype [2/2]

```
enum kpiMvcApi.DataTransferObjects.KvpDataDtoRs.charttype [strong]
```

Containing zhe available diagramm types

5.19.2.3 dataset [1/2]

```
enum kpiMvcApi.DataTransferObjects.KvpDataDtoRs.dataset [strong]
```

Containing the available diagramm data val == 0 => x axis, val > 0 => y axis

5.19.2.4 dataset [2/2]

```
enum kpiMvcApi.DataTransferObjects.KvpDataDtoRs.dataset [strong]
```

Containing the available diagramm data val == 0 => x axis, val > 0 => y axis

5.19.3 Constructor & Destructor Documentation

5.19.3.1 KvpDataDtoRs() [1/6]

```
kpiMvcApi.DataTransferObjects.KvpDataDtoRs.KvpDataDtoRs ( ) [inline]
```

Constructor loads the default data from 1.1.18 till today

5.19.3.2 KvpDataDtoRs() [2/6]

```
kpiMvcApi.DataTransferObjects.KvpDataDtoRs.KvpDataDtoRs (
    int id ) [inline]
```

Constructor loads the specified id

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.19.3.3 KvpDataDtoRs() [3/6]

```
kpiMvcApi.DataTransferObjects.KvpDataDtoRs.KvpDataDtoRs (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.19.3.4 KvpDataDtoRs() [4/6]

```
kpiMvcApi.DataTransferObjects.KvpDataDtoRs.KvpDataDtoRs ( ) [inline]
```

Constructor loads the default data from 1.1.18 till today

5.19.3.5 KvpDataDtoRs() [5/6]

```
kpiMvcApi.DataTransferObjects.KvpDataDtoRs.KvpDataDtoRs (
    int id ) [inline]
```

Constructor loads the specified id

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.19.3.6 KvpDataDtoRs() [6/6]

```
kpiMvcApi.DataTransferObjects.KvpDataDtoRs.KvpDataDtoRs (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.19.4 Member Function Documentation

5.19.4.1 `getChartBorderWidth()` [1/2]

```
int kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getChartBorderWidth ( ) [inline]
```

returns the boarer width

Returns

string containing the Chart boarer width

5.19.4.2 `getChartBorderWidth()` [2/2]

```
int kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getChartBorderWidth ( ) [inline]
```

returns the boarer width

Returns

string containing the Chart boarer width

5.19.4.3 `getChartTitle()` [1/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getChartTitle ( ) [inline]
```

Returns the chart title

Returns

string containing the Chart Title

5.19.4.4 getChartTitle() [2/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getChartTitle ( ) [inline]
```

Returns the chart title

Returns

string containing the Chart Title

5.19.4.5 getData() [1/2]

```
List<KvpDataDto> kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getData ( ) [inline]
```

Get all Data from [KvpDataDto](#)

Returns

List [KvpDataDto](#) A list with in this object loaded production data

5.19.4.6 getData() [2/2]

```
List<KvpDataDto> kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getData ( ) [inline]
```

Get all Data from [KvpDataDto](#)

Returns

List [KvpDataDto](#) A list with in this object loaded production data

5.19.4.7 getDataset() [1/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getDataset (
    charttype charttype,
    dataset dataset,
    string filter ) [inline]
```

Produces Datastrings for the html / chart.js charts

Parameters

<i>charttype</i>	
<i>dataset</i>	
<i>filter</i>	"y" year, "M" month, "d" day

Returns

string HTML.Raw Datastring string for direct implementation in html.raw() view

5.19.4.8 getDataset() [2/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getDataset (
    charttype charttype,
    dataset dataset,
    string filter ) [inline]
```

Produces Datastrings for the html / chart.js charts

Parameters

<i>charttype</i>	
<i>dataset</i>	
<i>filter</i>	"y" year, "M" month, "d" day

Returns

string HTML.Raw Datastring string for direct implementation in html.raw() view

5.19.4.9 getDatasetLabel() [1/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getDatasetLabel ( ) [inline]
```

Returns the chart label

Returns

string containing the Chartlabel text

5.19.4.10 getDatasetLabel() [2/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getDatasetLabel ( ) [inline]
```

Returns the chart label

Returns

string containing the Chartlabel text

5.19.4.11 `getDatasetBackgroundColor()` [1/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getDatasetBackgroundColor ( ) [inline]
```

Returns the chart colors

Returns

string containing the Chart background colors

5.19.4.12 `getDatasetBackgroundColor()` [2/2]

```
string kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getDatasetBackgroundColor ( ) [inline]
```

Returns the chart colors

Returns

string containing the Chart background colors

5.19.4.13 `getKvpList()` [1/2]

```
List<KvpDataDto> kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getKvpList ( ) [inline]
```

Returns the kvp list

Returns

string containing the Chartlabel text

5.19.4.14 `getKvpList()` [2/2]

```
List<KvpDataDto> kpiMvcApi.DataTransferObjects.KvpDataDtoRs.getKvpList ( ) [inline]
```

Returns the kvp list

Returns

string containing the Chartlabel text

5.19.4.15 loadData() [1/6]

```
void kpiMvcApi.DataTransferObjects.KvpDataDtoRs.loadData ( ) [inline]
```

loads the default data from 1.1.18 till today stores in object [KvpDataDtoRs](#)

5.19.4.16 loadData() [2/6]

```
void kpiMvcApi.DataTransferObjects.KvpDataDtoRs.loadData ( ) [inline]
```

loads the default data from 1.1.18 till today stores in object [KvpDataDtoRs](#)

5.19.4.17 loadData() [3/6]

```
void kpiMvcApi.DataTransferObjects.KvpDataDtoRs.loadData (
    int id ) [inline]
```

loads the specified dataset id stores in object [KvpDataDtoRs](#)

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.19.4.18 loadData() [4/6]

```
void kpiMvcApi.DataTransferObjects.KvpDataDtoRs.loadData (
    int id ) [inline]
```

loads the specified dataset id stores in object [KvpDataDtoRs](#)

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.19.4.19 loadData() [5/6]

```
void kpiMvcApi.DataTransferObjects.KvpDataDtoRs.loadData (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange stores in object [KvpDataDtoRs](#)

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.19.4.20 loadData() [6/6]

```
void kpiMvcApi.DataTransferObjects.KvpDataDtoRs.loadData (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange stores in object [KvpDataDtoRs](#)

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.19.4.21 setData() [1/2]

```
bool kpiMvcApi.DataTransferObjects.KvpDataDtoRs.setData (
    List< KvpDataDto > kvpdto ) [inline]
```

Adds Kvp Data into the database Generates new id for each datzaset

Parameters

<i>kvpdto</i>	List KvpDataDto a list of Kvp data data transfer object
---------------	---

Returns

booo success

5.19.4.22 setData() [2/2]

```
bool kpiMvcApi.DataTransferObjects.KvpDataDtoRs.setData (
    List< KvpDataDto > kvpdto ) [inline]
```

Adds Kvp Data into the database Generates new id for each datzaset

Parameters

<i>kvpdto</i>	List KvpDataDto a list of Kvp data data transfer object
---------------	---

Returns

booo success

5.19.5 Property Documentation

5.19.5.1 KvpDataRs

```
List< KvpDataDto > kpiMvcApi.DataTransferObjects.KvpDataDtoRs.KvpDataRs [get], [set]
```

A List of Kvp Data transfer Objects This List is loaded at construction and represent the actual Dataset

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/DataTransferObjects/KvpDataDtoRs.cs

5.20 kpiMvcApi.DataTransferObjects.ProductionDataDto Class Reference

Represents the Production data model Transfers the data between the WebFrontend and the Database Backend

Inheritance diagram for kpiMvcApi.DataTransferObjects.ProductionDataDto:

Properties

- int [PcbDailyId](#) [get, set]
Dataset Id
- DateTime [ProductionDay](#) [get, set]
The DateTime from the Data
- int [PcbQuantity](#) [get, set]
The Pcb quantity
- Decimal [PcbSumPrice](#) [get, set]
*The sum of the pcb price, Price * PcbQuantity*
- int [PcbGenerationId](#) [get, set]
The generation Id of the produced pcbs
- int [PcbClassId](#) [get, set]
The class Id of the produced pcbs
- string [PcbGenerationName](#) [get, set]
The PcbGenerationName of the produced pcbs
- string [PcbClassName](#) [get, set]
The PcbClassName of the produced pcbs

5.20.1 Detailed Description

Represents the Production data model Transfers the data between the WebFrontend and the Database Backend

5.20.2 Property Documentation

5.20.2.1 PcbClassId

```
int kpiMvcApi.DataTransferObjects.ProductionDataDto.PcbClassId [get], [set]
```

The class Id of the produced pcbs

5.20.2.2 PcbClassName

```
string kpiMvcApi.DataTransferObjects.ProductionDataDto.PcbClassName [get], [set]
```

The PcbClassName of the produced pcbs

5.20.2.3 PcbDailyId

```
int kpiMvcApi.DataTransferObjects.ProductionDataDto.PcbDailyId [get], [set]
```

Dataset Id

5.20.2.4 PcbGenerationId

```
int kpiMvcApi.DataTransferObjects.ProductionDataDto.PcbGenerationId [get], [set]
```

The generation Id of the produced pcbs

5.20.2.5 PcbGenerationName

```
string kpiMvcApi.DataTransferObjects.ProductionDataDto.PcbGenerationName [get], [set]
```

The PcbGenerationName of the produced pcbs

5.20.2.6 PcbQuantity

```
int kpiMvcApi.DataTransferObjects.ProductionDataDto.PcbQuantity [get], [set]
```

The Pcb quantity

5.20.2.7 PcbSumPrice

```
Decimal kpiMvcApi.DataTransferObjects.ProductionDataDto.PcbSumPrice [get], [set]
```

The sum of the pcb price, Price * PcbQuantity

5.20.2.8 ProductionDay

```
DateTime kpiMvcApi.DataTransferObjects.ProductionDataDto.ProductionDay [get], [set]
```

The DateTime from the Data

The documentation for this class was generated from the following file:

- C:/Users/Ulysses/Documents/01_StudyFhnw/815_veri/kpiWebMvc/kpiMvc/kpiMvcApi/DataTransferObjects/ProductionDataDto.cs

5.21 kpiMvcApi.DataTransferObjects.ProductionDataDtoRs Class Reference

This Recordset stores a List of ProductionData Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend

5.21.1 Detailed Description

This Recordset stores a List of ProductionData Data transfer objects It provides all Methods to read, write, update and delete data from database It provides Methods to get HTML data for the frontend

5.21.2 Member Enumeration Documentation

5.21.2.1 charttype [1/2]

```
enum kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.charttype [strong]
```

Containing the available diagramm types

5.21.2.2 charttype [2/2]

```
enum kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.charttype [strong]
```

Containing the available diagramm types

5.21.2.3 dataset [1/2]

```
enum kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.dataset [strong]
```

Containing the available diagramm data val == 0 => x axis, val > 0 => y axis

5.21.2.4 dataset [2/2]

```
enum kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.dataset [strong]
```

Containing the available diagramm data val == 0 => x axis, val > 0 => y axis

5.21.3 Constructor & Destructor Documentation

5.21.3.1 ProductionDataDtoRs() [1/6]

```
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.ProductionDataDtoRs ( ) [inline]
```

Constructor loads the default data from 1.1.18 till today

5.21.3.2 ProductionDataDtoRs() [2/6]

```
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.ProductionDataDtoRs (
    int id ) [inline]
```

Constructor loads the specified id

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.21.3.3 ProductionDataDtoRs() [3/6]

```
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.ProductionDataDtoRs (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.21.3.4 ProductionDataDtoRs() [4/6]

```
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.ProductionDataDtoRs ( ) [inline]
```

Constructor loads the default data from 1.1.18 till today

5.21.3.5 ProductionDataDtoRs() [5/6]

```
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.ProductionDataDtoRs (
    int id ) [inline]
```

Constructor loads the specified id

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.21.3.6 ProductionDataDtoRs() [6/6]

```
kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.ProductionDataDtoRs (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

Constructor loads with the specified daterange

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.21.4 Member Function Documentation

5.21.4.1 getChartBorderWidth() [1/2]

```
int kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getChartBorderWidth ( ) [inline]
```

returns the boarer width

Returns

string containing the Chart boarer width

5.21.4.2 getChartBorderWidth() [2/2]

```
int kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getChartBorderWidth ( ) [inline]
```

returns the boarer width

Returns

string containing the Chart boarer width

5.21.4.3 getChartTitle() [1/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getChartTitle ( ) [inline]
```

Returns the chart title

Returns

string containing the Chart Title

5.21.4.4 getChartTitle() [2/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getChartTitle ( ) [inline]
```

Returns the chart title

Returns

string containing the Chart Title

5.21.4.5 getData() [1/2]

```
List<ProductionDataDto> kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getData ( ) [inline]
```

Get all Data from ProductionData

Returns

List [ProductionDataDto](#) A list with in this object loaded production data

5.21.4.6 getData() [2/2]

```
List<ProductionDataDto> kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getData ( ) [inline]
```

Get all Data from ProductionData

Returns

List [ProductionDataDto](#) A list with in this object loaded production data

5.21.4.7 getDataset() [1/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getDataset (
    charttype charttype,
    dataset dataset,
    string filter ) [inline]
```

Produces Datastrings for the html / chart.js charts

Parameters

<i>charttype</i>	
<i>dataset</i>	
<i>filter</i>	
<i>filter</i>	"y" year, "M" month, "d" day

5.21.4.8 getDataset() [2/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getDataset (
    charttype charttype,
    dataset dataset,
    string filter ) [inline]
```

Produces Datastrings for the html / chart.js charts

Parameters

<i>charttype</i>	
<i>dataset</i>	
<i>filter</i>	
<i>filter</i>	"y" year, "M" month, "d" day

5.21.4.9 getDatasetLabel() [1/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getDatasetLabel ( ) [inline]
```

Returns the chart label

Returns

string containing the Chartlabel text

5.21.4.10 getDatasetLabel() [2/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getDatasetLabel ( ) [inline]
```

Returns the chart label

Returns

string containing the Chartlabel text

5.21.4.11 getDatasetBackgroundColor() [1/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getDatasetBackgroundColor ( ) [inline]
```

Returns the chart colors

Returns

string containing the Chart background colors

5.21.4.12 getDatasetBackgroundColor() [2/2]

```
string kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.getDatasetBackgroundColor ( ) [inline]
```

Returns the chart colors

Returns

string containing the Chart background colors

5.21.4.13 loadData() [1/6]

```
void kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.loadData ( ) [inline]
```

loads the default data from 1.1.18 till today stores in object `ProductionData`

5.21.4.14 loadData() [2/6]

```
void kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.loadData ( ) [inline]
```

loads the default data from 1.1.18 till today stores in object `ProductionData`

5.21.4.15 loadData() [3/6]

```
void kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.loadData (
    int id ) [inline]
```

loads the specified dataset id stores in object `ProductionData`

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.21.4.16 loadData() [4/6]

```
void kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.loadData (
    int id ) [inline]
```

loads the specified dataset id stores in object `ProductionData`

Parameters

<i>id</i>	id of requested dataset
-----------	-------------------------

5.21.4.17 loadData() [5/6]

```
void kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.loadData (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

loads with the specified daterange stores in object `ProductionData`

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.21.4.18 loadData() [6/6]

```
void kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.loadData (
    DateTime startdate,
    DateTime stopdate ) [inline]
```

loads with the specified daterange stores in object `ProductionData`

Parameters

<i>startdate</i>	dataset start date (including)
<i>stopdate</i>	dataset stop date (including)

5.21.4.19 setData() [1/2]

```
bool kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.setData (
    List< ProductionDataDto > ppdto ) [inline]
```

Adds Production Data into the database Generates new id for each datzaset

Parameters

<i>ppdto</i>	List ProductionDataDto a list of Production data data transfer object
--------------	---

Returns

booo success

5.21.4.20 setData() [2/2]

```
bool kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.setData (
    List< ProductionDataDto > ppdto ) [inline]
```

Adds Production Data into the database Generates new id for each datzaset

Parameters

<i>ppdto</i>	List ProductionDataDto a list of Production data data transfer object
--------------	---

Returns

booo success

5.21.5 Property Documentation**5.21.5.1 ProductionDataRs**

```
List< ProductionDataDto > kpiMvcApi.DataTransferObjects.ProductionDataDtoRs.ProductionDataRs
[get], [set]
```

A List of ProductionData Data Transfer Object This List is loaded at construction and represent the actual Dataset

The documentation for this class was generated from the following file:
